# **Aryan Mittal**

678-650-7251 | thearyanmittal@gmail.com | thearyanmittal.com | github.com/thearyanmittal | U.S. Citizen

#### EDUCATION

## Georgia Institute of Technology

Atlanta, GA

Bachelor of Science, Double Major in Computer Science and Mathematics, GPA: 4.0

Expected May 2026

- Concentrations: AI/Machine Learning, Information Internetworks, Probability & Statistics
- Relevant Coursework: Deep Learning\*, Machine Learning\*, Data Structures & Algorithms, Probability & Statistical Theory, Advanced Game Theory, Information Theory, Database Systems (\* graduate-level coursework)

## EXPERIENCE

Microsoft May 2024 – August 2024

Software Engineering Intern

Atlanta, GA

- Reduced network node failure detection time from **3 days** to **1 hour** and saved **8+ hours** weekly by designing, implementing, unit testing, and deploying .NET service in C# to monitor router health from Azure servers
- Created utility service to export 2000+ rows of test result data per hour using Kusto queued ingestion API
- Authored comprehensive documentation on both services for use by team of 30+ developers
- Skills: C#, .NET Framework, Computer Networking, Azure, Kusto, Azure Data Explorer, PowerShell

#### Data Science Student Researcher

January 2023 - Present

Joel Sokol Lab (Georgia Tech)

Atlanta, GA

- Contracted by MLB team to develop **optimization model** for enhancing league efficiency and competitiveness (results under review by **MLB Commissioner's Office**, confidential, **details discussable in person**)
- First-authoring paper on model and co-designing graduate Sports Analytics course at Georgia Tech
- Designed logistic regression/Markov chain model to predict NFL playoffs (beats consensus spread: 63% accuracy)
- Skills: Python, PyTorch, TensorFlow, Scikit-learn, Pandas, NumPy, Gurobi, Mathematical Optimization

## **UPS Supply Chain Solutions**

June 2023 – August 2023

Software Engineering and Analytics Intern

Alpharetta, GA

- Prototyped 98% accurate cloud-based computer vision application for package damage detection and reporting (est. annual savings \$5M)
- Restructured timecard database (1.5M entries) and corrected the pay rates for 350K workers using Python script
- Wrote 3 automated test suites for new workforce management system (WMS) to be used by 400K employees
- Created 4 Power BI reports to track work item status across entire WMS project (60+ personnel)
- Skills: Power BI, Google Cloud Platform, BigQuery, Vertex AI, Python, Pandas, Flask, Java, Azure DevOps

#### Mathematics Teaching Assistant

August 2023 – Present

School of Mathematics, Georgia Tech

Atlanta, GA

- Courses Taught: Multivariable Calculus, Linear Algebra
- $\bullet$  Teach weekly studio/recitation sessions to 70+ students, hold weekly office hours, and grade assignments

## PROJECTS

Predicting the NFL Playoffs with LRMC  $\mid$  github.com/thearyanmittal/nfl-lrmc

January 2023 – May 2023

- Designed a logistic regression/Markov chain (LRMC) model to predict outcomes of NFL playoffs with 63% accuracy (beats Vegas spread)
- Performed chi-squared hypothesis tests to compare models and evaluated XGBoost/decision tree model blends
- Originated novel metric for measuring football team performance by numerically integrating win probability

### Package Damage Detection and Report

July 2023

- Awarded 1st Place among Google Cloud projects and 2nd Place across entire company (250+ participants)
- Created ResNet vision model to detect damaged packages in warehouses and a Looker report to visualize trends
- Pitched design to panel of UPS CEO, CTO, and 10 VPs as team captain (team of 5)

#### The Cordiality Game | Graph Theory Publication

October 2021 – May 2023

- Invented graph-theoretic game with applications in statistical physics and proved 2 optimal play theorems
- Authored final paper ("The Cordiality Game" published in Q2 journal Graphs & Combinatorics)

## TECHNICAL SKILLS

Languages: Python, C#, Java, SQL, HTML/CSS

Technologies: PyTorch, TensorFlow, Scikit-learn, Pandas, NumPy, XGBoost, Power BI, BigQuery, Gurobi, OpenCV, Matricellik, Sasharm, Printer, Diange, Florik, PanutifulSonn, Scienium, NET Framework

Matplotlib, Seaborn, Pyplot, Django, Flask, BeautifulSoup, Selenium, .NET Framework
